Récurtivité : parcours d'arbres binaires

Questions : On suppose que les fonctions `infix` et `postfix` affichent la suite des nœuds d'un arbre binaire (`[racine, gauche, droite]`) respectivement dans un ordre infixé et postfixé. Qu'affichent les appels suivants ?

1. >>> `postfix([1, [], [2, [], [3, [5, [], []], [4, [], []]])`
2. >>> `postfix([1, [3, [5, [], []], []], [2, [], [4, [], []]])`
3. >>> `infix([6, [4, [2, [], []], []], [3, [], [1, [], []]])`
4. >>> `postfix([2, [4, [], []], [1, [], [6, [], [3, [], []]])`
5. >>> `postfix([1, [2, [4, [], []], [3, [5, [], []], []], []])`
6. >>> `postfix([1, [3, [5, [], []], [4, [], []], [2, [], []]])`
7. >>> `postfix([2, [4, [], [6, [], []], [1, [3, [], []], []]])`
8. >>> `infix([1, [2, [4, [], []], [3, [5, [], []], []], []])`
9. >>> `infix([2, [4, [], [6, [], []], [1, [3, [], []], []]])`
10. >>> `infix([5, [3, [1, [], []], []], [4, [], [2, [], []]])`
11. >>> `infix([1, [], [2, [], [3, [5, [], []], [4, [], []]])`
12. >>> `postfix([2, [4, [], []], [1, [], [6, [], [3, [], []]])`
13. >>> `postfix([1, [3, [], [5, [], []], [2, [4, [], []], []]])`
14. >>> `infix([2, [4, [], []], [1, [], [6, [], [3, [], []]])`
15. >>> `infix([1, [3, [], [5, [], []], [2, [4, [], []], []]])`
16. >>> `postfix([2, [4, [6, [], []], []], [1, [], [3, [], []]])`
17. >>> `infix([2, [4, [], []], [1, [], [6, [], [3, [], []]])`
18. >>> `postfix([5, [3, [1, [], []], []], [4, [], [2, [], []]])`
19. >>> `infix([1, [3, [5, [], []], []], [2, [], [4, [], []]])`
20. >>> `infix([2, [], [1, [4, [], []], [6, [], [3, [], []]])`
21. >>> `infix([1, [3, [5, [], []], [4, [], []], [2, [], []]])`
22. >>> `postfix([6, [4, [2, [], []], []], [3, [], [1, [], []]])`
23. >>> `postfix([2, [], [1, [4, [], []], [6, [], [3, [], []]])`
24. >>> `infix([2, [4, [6, [], []], []], [1, [], [3, [], []]])`
